

# Getting started on BusinessSite

Slug: getting-started | Category: start

## Summary

Register free on web or Android, complete your profile (phone, photo, sector, role), then use chat for eShop, email, apps, and support. Platform fee is 3% only when you trade.

## Guide

### 1. Register

Web: open </businesssite/register>. Mobile: install TA5 or RC1 from Powered Apps, create profile with phone + selfie.

Watch the how-to reel on the homepage section [#how-to-register](#).

### 2. First chat commands

- help or guides - this menu
- show me apps - catalog
- open mall - eShop atrium
- email help - mail from chat
- login to web / scan qr - link mobile profile to browser chat (see guide mobile)

### 3. Use chat on the web (same phone profile)

On the phone: say login to web or scan qr. On a computer keep the page with the large Scan QR to login on web code open (homepage or </businesssite/chat>). Point the phone camera at that code.

After a successful scan the browser opens the full chat dashboard (not the yellow Demo Mode shell) with your name and phone in the header, chips, and voice. Chat history is shared with the mobile app for the same phone (poll every few seconds). To disconnect this browser, use Unlink phone in the header (or open [/businesssite/unlink\\_web\\_chat\\_session?redirect=1](/businesssite/unlink_web_chat_session?redirect=1)). Re-scan to link again. Details: guide mobile.

Support providers: also use the QR on </businesssite/support/profile> - see guide support.

### 4. Leave any wizard

Say stop or cancel anytime. Say continue to stay in the current flow.

## Chat commands

help · guide · how to register · how-to videos

## Exit multi-step flows

Say STOP or CANCEL or EXIT at any time. Say CONTINUE to stay in the current wizard.

## How-to videos

Homepage reel: <https://businesssite.online/businesssite#how-to-register>

Chat: say "how-to videos" or "guide getting-started"
