

Edit your site and eShop by message

Slug: site-edit | Category: eshop

Summary

Owners and staff edit the brand homepage and the eShop shelf by chat. The shop chat page is locked with an authenticator app (Google Authenticator, Microsoft Authenticator, or Authy). Open bakoenaonline.com/chat or cakecoutureonline.com/chat, text a setup SMS to the phone on the human account, then add the setup key as a time-based account. After that, enter the 6-digit code to unlock the browser for 8 hours. In the BusinessSite app, write otp 123456 before the command. Commands: set hero, set lead, set tagline, set theme light or dark, set announcement, create product NAME at RPRICE, preview my site.

Guide

Who this is for

Owners and staff of a BusinessSite such as Bakoena Holdings or Cake Couture.

You change the public homepage and the eShop shelf by sending a message.

The same words work in the BusinessSite app and on the shop's own chat page.

The chat page is not open to the public. Owner and staff each use an authenticator app.

Set up the authenticator app

- On your phone, install one of these free apps: Google Authenticator, Microsoft Authenticator, or Authy. Use the Play Store or the App Store.
- Open your shop chat page:
bakoenaonline.com/chat,
cakecoutureonline.com/chat,
or [/businesssite/site/<slug>/chat](https://businesssite.site/<slug>/chat).
- Enter the phone number on your own BusinessSite human account (for Bakoena, Dr Teboho Matebesi uses 082 464 7664) and tap Text me a setup SMS. The SMS is sent only to that phone.
- Enter the SMS digits. The page shows a setup key and a QR code.
- In the authenticator app choose Add account, then Enter a setup key (or scan the QR code). Account name: the shop. Key type: time based. Type the key from the page.
- Type the 6-digit code from the app into the page and tap Confirm authenticator.
- To edit again later, enter a fresh 6-digit code. That browser stays unlocked for 8 hours.

Each owner and each staff member does this on their own phone. A person who only knows the public phone number cannot edit the site. If you lose the phone, ask BusinessSite to reset the authenticator.

In the BusinessSite app, put the current code on the same line as the command:
otp 123456 set hero Speak. Supply. Build.

Where to send the message

- BusinessSite app or web chat - open chat and tap Edit my site, or type edit my site. Use the phone number on your human account (for Bakoena, Dr Teboho Matebesi's account, 082 464 7664).

- Your own chat page -
bakoena Holdings.online/chat,
cakecouture.online/chat,
or /businesssite/site/<slug>/chat for any other shop.
Enter that same phone once. It stays on this browser.

If you manage more than one shop, start with use shop bakoena
or use shop cakecouture.

Brand site

These lines change the homepage visitors see. Refresh the site after each one.

- set hero Speak. Supply. Build. - large headline
- set lead One sentence under the hero. - paragraph under the headline
- set announcement We deliver in Gauteng. - banner on the site
- set about ... - about note stored for the site
- set farming ... - farming note (Bakoena)
- set ict ... - ICT note (Bakoena)
- set digital ... - digital note (Bakoena)
- set medical ... - medical lead (Bakoena)
- set phone 082 464 7664 - phone shown to visitors
- set email hello@yourdomain - email shown to visitors
- set theme light or set theme dark - default light or dark. A visitor who already chose a theme keeps their choice.

eShop shelf

Shoppers see this on /eshop/your-slug/ and on the product page.
Prices still follow the eyesWallet ladder (shop, online, app card, app + eyesWallet).

- set tagline Medical devices and consumables
- set kicker Bakoena Medical · Kyalami
- set subline Shop, online, or eyesWallet.
- set accent #0080FE - shelf accent colour
- set background #f4f7fb - shelf background
- set logo https://example.com/logo.png - logo from a public image address
- change my theme · design my eshop
- list products
- create product Nitrile Gloves at R189
- change product price Nitrile Gloves to R199
- add product Nitrile Gloves photo - attach the picture in the same chat
- deactivate product Nitrile Gloves
- eshop help - the full shelf command list

BusinessSite User Guide

Check the result

Say preview my site. Then open the homepage and the shelf:

- Bakoena - bakoena Holdings.online and /shop
- Cake Couture - cakecouture.online and /shop

What a message does not change

- Your human profile stays a person. The shop stays a separate business.
- Sample medical lines still need a SAHPRA listing, lot, and intended use before clinical supply.
- Light/dark on a browser that already saved a choice is not overwritten.
- Say stop to leave a longer design interview (design my eshop).
